### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4-12, 16-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Hogue et al. U.S. Patent 6,000,942.

Hogue et al disclosed a device comprising first (1) and second (2) sensor operatively configured to provide position information of at least first and second points; a display (31); an interface device such as a computer or driver (7) coupled to the first and second sensors for transmit the motions of the device (column 2, lines 50-67) to the display; the first and second sensors are configured as a headset or head mounted sensor (see abstract), the display includes a computer monitor (31) or a head mounted display (48) which is equivalent to a pair of glasses; the motions of the device includes roll, pitch, and yaw motions (see column 4, lines 25-32); and the interface inherently includes an attachment device for connecting to the computer (7).

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3714

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hogue et al in view of Freisleben et al. U.S. Patent 4,930,888.

It is noted that Hogue et al failed to teach the use of a wireless transceiver as an interface device. However, such wireless transceiver is well known in the art as evidenced by a situation display system using a remote control console for transmitting the signal generating from the headband to a display. Accordingly, it would have been obvious to one of ordinary skill in the art to modify the interface of Hogue et al with the use of a remote control console as taught by Freisleben et al for the purpose enhancing the performance of the display system.

***Allowable Subject Matter***

Claims 13-15, 19, and 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
